To Whom It May Concern,

ICC-ES PMG has evaluated the POLYMELT Polypropylene (PP-RCT) and (PP-R) piping system and have found that both the pipe and fittings meet the requirements of latest versions of both NSF/ANSI 14 and NSF/ANSI/CAN 61.

We also confirm that the piping system complies with the Uniform Plumbing Code (UPC), International Plumbing Code (IPC) and International Residential Code (IRC) for plumbing applications and the Uniform Mechanical Code (UMC), International Mechanical Code (IMC) and International Residential Code (IRC) for hydronic heating applications.

A full copy of the ICC-ES PMG report can be found on our directory under PMG-1458.

ICC-ES PMG an accredited third-party certification agency by the American National Standards Institute (ANSI) and the Standards Council of Canada (SCC).

Should you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'Maribel Campos', with a stylized flourish at the end.

Maribel Campos
Vice President of ES-PMG Standards
